Meeder Aggressive Growth

Investment Strategy

Utilizing Meeder Funds as the building blocks of a diversified portfolio, the Portfolio can shift between sectors, styles, global opportunities and capitalization ranges. The Portfolio is suitable for investors whose risk profile is such that they can tolerate volatility that is slightly greater than the stock market.

Objective

The Aggressive Growth Portfolio seeks growth of capital over a long-term time horizon with the goal of outperforming the broad stock market over a complete market cycle, while remaining fully invested in equities under normal circumstances.

Average Annual Total Returns

	YTD	1 YEAR	3 YEAR	5 YEAR	10 YEAR	INCEPTION DATE
Gross Return	12.06%	15.33%	18.57%	10.05%	10.07%	4/30/2010
Net Return	9.53%	11.87%	15.01%	6.76%	6.81%	–
Morningstar Aggressive Target Risk Index	11.50%	14.27%	18.85%	9.62%	11.14%	-

The performance data shown represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance data shown is for the Meeder composite portfolio, your portfolio may experience different results from those shown here, and current performance of the composite may be lower or higher than the performance data quoted. The Net Composite Return represents the Gross Composite Return of the portfolio reduced by an annual fee of 3.0%, the maximum fee charged to investors in this program.

DISCLOSURE

Portfolio Description: Each Meeder investment portfolio is allocated exclusively among a portfolio of Meeder mutual funds designed to meet specific investment objectives and risk tolerance levels. Meeder is the investment adviser for the Meeder Funds and Meeder and its affiliates earn investment advisory, administrative, transfer agent and distribution fees for various services provided to the funds.

Composite Description: The portfolio composite includes all fully discretionary accounts managed by Meeder that utilize the selected investment strategy. Meeder offers the program as a model investment strategy but does not have investment authority over client accounts opened at other firms. Portfolio allocation for these accounts may differ from the composite and clients invested through intermediary firms will experience performance results different from the performance results produced by Meeder discretionary management of the model.

Composite Performance: Investment performance reflects the time weighted return of the composite and assumes reinvestment of all dividend and capital gain distributions. Returns for periods less than one year are not annualized. Performance is calculated in U.S. dollars and is presented net of all fees including the internal expenses of the Meeder Funds included in the portfolio. Meeder does not charge a separate fee for managing the portfolios; however, each Fund within the portfolio contains a management fee within its expense ratio. Net Return reflects deduction of a 3.0% annual fee, the maximum fee charged to investors in this program.

Expense Ratios: The Weighted Gross Expense Ratio reflects the weighted operating expense ratio of the funds in the portfolio gross of voluntary fee waivers or expense reimbursements. The Weighted Net Expense Ratio is the weighted net expense ratio of the funds in the portfolio as set forth in the fund's most recent annual report, which includes the effect of voluntary and contractual fee waivers and expense reimbursements. Without these waivers, performance would have been lower. The Adjusted Net Expense Ratio reflects the Net Expense Ratio excluding Dividends on Short Sales and Interest Expense as reported in the Fund's prospectus.

Portfolio Benchmarks: The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The **Morningstar Aggressive Target Risk Index** seeks approximately 95% exposure to global equity markets. The **Morningstar Moderately Aggressive Target Risk Index** seeks approximately 80% exposure to global equity markets. The **Morningstar Moderate Target Risk Index** seeks approximately 60% exposure to global equity markets. The **Morningstar Moderately Conservative Target Risk Index** seeks approximately 40% exposure to global equity markets. The **Morningstar Conservative Target Risk Index** seeks approximately 20% exposure to global equity markets.

Risk Considerations: The portfolios are invested in Meeder Funds. Some Meeder Funds routinely utilize equity index futures to equitize cash positions in the portfolio. The Spectrum Fund utilizes short positions and leverage to achieve its investment objectives. Carefully consider the investment objectives, risks and expenses of the component funds before investing. The prospectus contains this and other information about the funds.

Morningstar Disclosure: Equity style box analysis provided by Morningstar®. The style box reveals a portfolio's investment style. For equity funds the vertical axis shows the market capitalization of the stocks owned and the horizontal axis shows investment style (value, blend, or growth). For fixed income funds, the vertical axis shows the credit quality of the bonds owned and the horizontal axis shows interest rate sensitivity as measured by a bond's effective duration (limited, moderate, or extensive).

Firm Information: The portfolios are managed by Meeder Advisory Services, Inc., a registered investment adviser. An affiliate, Meeder Asset Management, Inc., serves as the investment adviser to Meeder Funds and is paid a fee for its services. Meeder Funds are distributed by Meeder Distribution Services, Inc., an affiliated broker dealer, Member FINRA.

Meeder Conservative

Investment Strategy

Utilizing Meeder Funds as the building blocks of a diversified portfolio, the Portfolio can shift between sectors, styles, global opportunities and capitalization ranges. The Portfolio is suitable for investors whose risk profile is such that they can tolerate volatility that is slightly greater than the stock market.

Objective

The Conservative Portfolio seeks to provide risk averse investors with an asset mix that experiences lower volatility of returns.

Average Annual Total Returns

	YTD	1 YEAR	3 YEAR	5 YEAR	10 YEAR	INCEPTION DATE
Gross Return	3.02%	4.62%	9.11%	4.18%	4.62%	12/31/2009
Net Return	0.69%	1.48%	5.84%	1.06%	1.52%	–
Morningstar Conservative Target Risk Index	0.08%	1.45%	7.13%	1.60%	3.32%	–

The performance data shown represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance data shown is for the Meeder composite portfolio, your portfolio may experience different results from those shown here, and current performance of the composite may be lower or higher than the performance data quoted. The Net Composite Return represents the Gross Composite Return of the portfolio reduced by an annual fee of 3.0%, the maximum fee charged to investors in this program.

DISCLOSURE

Portfolio Description: Each Meeder investment portfolio is allocated exclusively among a portfolio of Meeder mutual funds designed to meet specific investment objectives and risk tolerance levels. Meeder is the investment adviser for the Meeder Funds and Meeder and its affiliates earn investment advisory, administrative, transfer agent and distribution fees for various services provided to the funds.

Composite Description: The portfolio composite includes all fully discretionary accounts managed by Meeder that utilize the selected investment strategy. Meeder offers the program as a model investment strategy but does not have investment authority over client accounts opened at other firms. Portfolio allocation for these accounts may differ from the composite and clients invested through intermediary firms will experience performance results different from the performance results produced by Meeder discretionary management of the model.

Composite Performance: Investment performance reflects the time weighted return of the composite and assumes reinvestment of all dividend and capital gain distributions. Returns for periods less than one year are not annualized. Performance is calculated in U.S. dollars and is presented net of all fees including the internal expenses of the Meeder Funds included in the portfolio. Meeder does not charge a separate fee for managing the portfolios; however, each Fund within the portfolio contains a management fee within its expense ratio. Net Return reflects deduction of a 3.0% annual fee, the maximum fee charged to investors in this program.

Expense Ratios: The Weighted Gross Expense Ratio reflects the weighted operating expense ratio of the funds in the portfolio gross of voluntary fee waivers or expense reimbursements. The Weighted Net Expense Ratio is the weighted net expense ratio of the funds in the portfolio as set forth in the fund's most recent annual report, which includes the effect of voluntary and contractual fee waivers and expense reimbursements. Without these waivers, performance would have been lower. The Adjusted Net Expense Ratio reflects the Net Expense Ratio excluding Dividends on Short Sales and Interest Expense as reported in the Fund's prospectus.

Portfolio Benchmarks: The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The **Morningstar Aggressive Target Risk Index** seeks approximately 95% exposure to global equity markets. The **Morningstar Moderately Aggressive Target Risk Index** seeks approximately 80% exposure to global equity markets. The **Morningstar Moderate Target Risk Index** seeks approximately 60% exposure to global equity markets. The **Morningstar Moderately Conservative Target Risk Index** seeks approximately 40% exposure to global equity markets. The **Morningstar Conservative Target Risk Index** seeks approximately 20% exposure to global equity markets.

Risk Considerations: The portfolios are invested in Meeder Funds. Some Meeder Funds routinely utilize equity index futures to equitize cash positions in the portfolio. The Spectrum Fund utilizes short positions and leverage to achieve its investment objectives. Carefully consider the investment objectives, risks and expenses of the component funds before investing. The prospectus contains this and other information about the funds.
